SUMMARY

Full-stack developer with a strong background in Laravel and the TALL stack, experienced in building dynamic, user-facing web applications. I have worked across backend and frontend development, and I'm comfortable collaborating with design tools such as Figma and Adobe XD. In addition to Laravel-based projects, I've built websites using WordPress and Webflow, giving me exposure to a wide range of development workflows.

Currently, I'm working with the MERN stack and continuing to deepen my knowledge of API design, modern frontend frameworks, and scalable application architecture.

WORK EXPERIENCE

Developer (2025-Present)

MEXTY AI CO., LTD.(Chiang Mai, Thailand)

- Built game-based learning components to support gamified teaching materials.
- Contributed to an internal team chat system for organizational communication.
- Assisted in developing a platform-level task management feature.
- Reviewed and refined code to maintain quality and stability.

PHP Developer (2023-2025)

Azendo Co.,Ltd, E-fire department (Chiang Mai, Thailand)

- Developed a Fire Inspection management system for E-fire, a company in Denmark.
- Created and implemented new features as assigned, while fixing bugs to improve functionality.
- Utilized Adobe XD to design wireframes and gather requirements from clients.
- Conducted manual testing on both personal and senior developers' work to ensure quality.
- Assisted with project management tasks to facilitate smooth project execution.
- Updated and adjusted the E-fire website on WordPress as needed.

Technical officer (2016 - 2019)

Management System Certification Institute (Bangkok, Thailand)

- Served as Document Control Officer, managing inspection body documentation under ISO/IEC 17020, organizing internal audits, and facilitating annual management review meetings.
- Coordinated multiple high-profile projects, including the DBD Wellness Award Standard (Ministry of Commerce), Eco-town Center Standard (Ministry of Industry), and The Prime Minister's Industry Award.
- Acted as a liaison between clients, customers, and industry experts, scheduling consulting sessions, organizing training seminars, and managing all logistics, including catering and supplier coordination.

VOLUNTEERING EXPERIENCE

Junior Developer (2022-2023)

New Zealand Business Association (Remote)

- Collaborated with a team to develop an accounting web app, gaining hands-on experience in Angular and expanding front-end skills.
- Utilized Azure DevOps for project management and collaboration, strengthening team-working abilities in a development environment.

Member liaison/admin assistant (2022-2023)

Volunteer Wellington (Wellington, NZ)

- Conducted regular outreach to member organizations, ensuring they received necessary services and support.
- Updated and maintained organization records, verifying and amending information as needed.

EDUCATION

Graduate Diploma in Information Technology (July 2021- June 2022)

Wellington Institute of Technology, New Zealand

Courses: Game Development (Unity), Testing & Secure coding, Human-Computer Interaction, Project Management, Web Application Development (.NET MVC), Capstone project: Web-based project management (PHP, JavaScripts/JQuery, MySQL)

M.Sc. Business Information System (2019)

King Mongkut's University of Technology Thonburi - Bangkok, Thailand

Final project: Sentiment analysis from Reviews Information of Online Accommodation Booking Services Project using Python, Libraries (eg. NLTK, sklearn)

B.Eng. Mechanical Engineering (Electrical-Mechanical Manufacturing Engineering) with First Class Honours (2011 - 2015)

Kasetsart University - Bangkok, Thailand

Final Project: Velocity, Acceleration, Vibration Monitoring in Train, use accelerometer and gyroscope sensor connected with Raspberry Pi to monitor train motion

TECHNICAL SKILLS

Web & Full-Stack Development

Frameworks & Stacks: Laravel (TALL stack), MERN (MongoDB, Express.js, React, Node.js)

CMS & Builders: WordPress, Webflow

UI / UX & Design Collaboration

Figma, Adobe XD

Tools & Workflow

Git, Jira, Trello, Azure DevOps

PROJECTS & EXPERIENCE

- Developing a **gamified learning platform**, building reusable game-based components for interactive teaching materials.
- Contributing to an **internal team chat system** and **task management features** within the platform.
- Enhanced a **Fire Inspection system** for Denmark's E-fire through UI improvements, bug fixing, testing, and WordPress updates.
- Built responsive websites using **Webflow** from Figma designs, including CMS and custom functionality.
- Developed full-stack projects including a **CRUD expense manager** and a **simple eCommerce application**.
- Collaborated using Git and Azure DevOps across team projects.

ADDITIONAL SKILLS

Communication & Collaboration: Worked directly with clients, designers, and developers to deliver project requirements.

Time Management: Balanced full-time work with part-time postgraduate study and project deadlines.

Leadership & Ownership: Experience coordinating tasks, reviewing work, and maintaining project documentation.

Continuous Learning: Self-driven learner, adapting to new tools, frameworks, and AI-assisted development workflows.

CERTIFICATION / SHORT COURSES

Web Design Training Package

Yoobee Colleges

The Complete SQL Bootcamp by Jose Portilla

Udemy (online)

LANGUAGE SKILLS

Thai (Native Language)

English (IELTS 6.5, Jan 2020)

Japanese (JLPT N3 (Basic), Dec 2018)

PERSONAL INTERESTS

I enjoy knitting and learning Japanese, and I continue to enhance my programming skills through online resources like YouTube. To maintain fitness, I enjoy jogging, stretching yoga, and playing badminton. Additionally, I love traveling and hiking to explore nature.
